# e-Signature Creation - Adobe Reader

1. Scan the Sign from Scanner Machine and save to PC

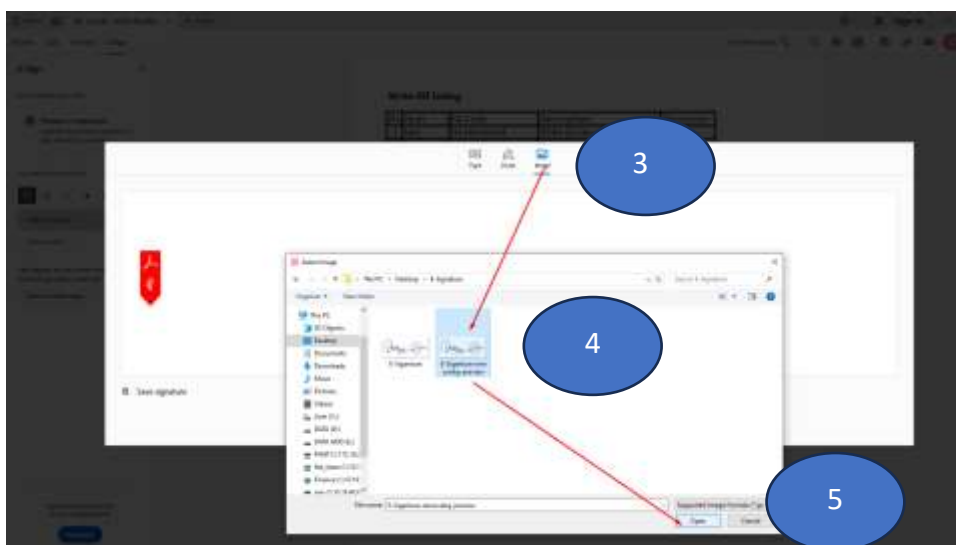

2. Open Adobe Reader
   Go to E-Sign → Press **+ icon → click button **Image** → search the signature from scan folder → **Open**

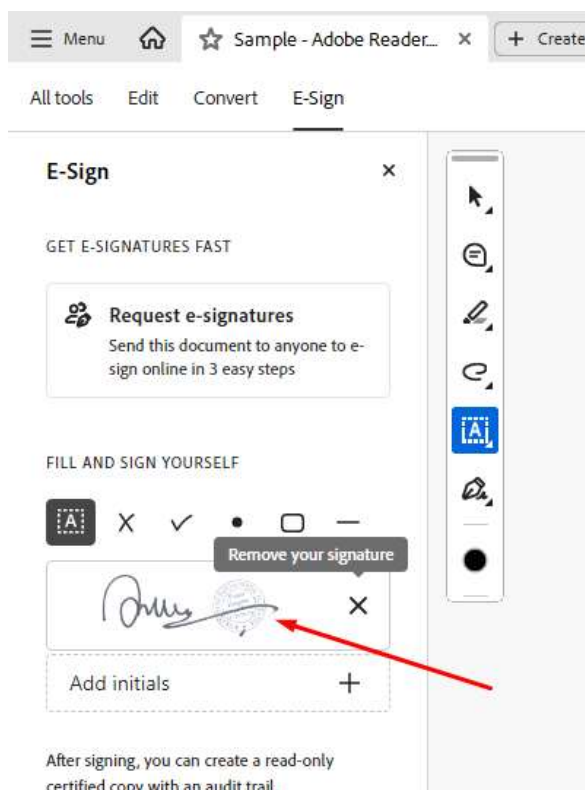

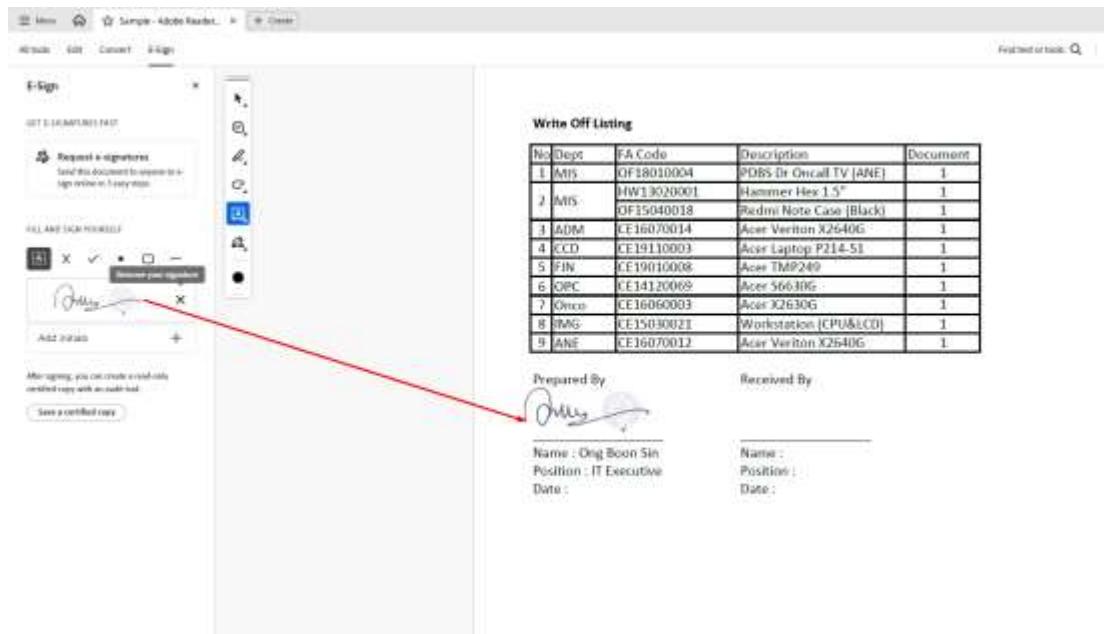

1

3. After press **Open** button, the box will show the signature picture, then press **Apply** button to upload

4. After press **Apply** button, the signature will capture into the E-Sign Column.

5. Follow the arrow, we can drag the E-signature to sign.

** This is the step Adobe Reader E-Signature and for All Reference only, If you all have any better than this can using your own also. Thanks.
